SECTION II: COMPOSITION/ INFORMATION ON INGREDIENTS

This product has not been tested as a whole for health effects on animals or humans. According to the OSHA Hazardous Communications Standard (29 CFR 1910.1200) any hazardous ingredients that comprise >1.0% of the material and any carcinogenic ingredients that comprise >0.1% must be listed on the MSDS. When individually tested at 100% ingredients in the make-up of this product posed the following health hazards. This product is further diluted 11/2 to 2 scoops with 1 gallon of water.

SECTION II a: HAZARDOUS INGREDIENTS >1.0%

Chemical Name	CAS #	PEL	TLV
Nonylphenol Ethoxylate	127087-87-0	NA	NA
Sodium Metasilicate	6834-92-0	NA	NA

SECTION II b: CARCINOGENIC INGREDIENTS AT >0.1%

Chemical Name	CAS #	PEL	TLV
Trisodium Nitrilotriacetate	18662-53-8	NA	NA

* = Listed as a possible carcinogen by IARC and NTP. Detergents containing Sodium Nitrilotriacetate are exempt from labeling under California Proposition 65 because exposure in detergent applications are significantly less than the “**NO SIGNIFICANT RISK LEVEL**” established by Cal-EPA for this compound. The Universities Associated for Research and Education in Pathology, Inc. determined that the cancer risk to man was so low ‘one in ten million or less’ as to be of no practical significance. Thus UAREP concluded that ‘**use of NTA in detergent products does not pose a practical risk to human health.**’
