

RADIOS

The Motorola RDX™ Series of business two-way radios is designed for heavy duty, everyday industrial use. The lightweight XTN Series is perfectly suited for construction, manufacturing, property management, security, retail, and more. Operating on FCC frequencies reserved exclusively for business use, these powerful two-way radios help businesses keep operations on schedule, maximize job shift productivity, enhance security, and increase overall customer satisfaction.

KENWOOD

The all new 200 Series UHF & VHF portable two-way radios begin a new tradition of durability, features and function for professional grade job site communications. These new portables are compact, with brand new ergonomics for comfortable user operation and control. The 2 Watt transmitter and precise receiver design make these radios perfect for on-site or in-building use for construction, retail, hospitality, warehousing and rental fleets. The 200 Series includes a progressive feature set that is unmatched in this radio category, including several innovations such as wireless cloning, channel voice announcement, FleetSync PTT ID, and multiple signaling formats. The TK-2200/3200s, like all Kenwood radios, have excellent transmit/receive audio, will operate 18 hours on a fully charged battery, and have a wide operating bandwidth of 20 MHz UHF and 24 MHz
